OUR UNIVERSE IS EXPANDING

BRU™ product technologies provide ultra-reliable data backup, restore, and archival solutions for SOHO, SMB, enterprise, and M&E users and OEMs. Based on 35 years of legendary reliability, BRU is the only genuinely cross-platform backup and archival solution that exists. The adoption of the BRU product line further establishes OWC as the premiere provider of the most reliable backup and archival solutions available for both existing and new OWC and BRU customers.

Check out the latest BRU solutions on

LumaForge is the creator of the award-winning family of Jellyfish shared storage solutions. Jellyfish servers provide ultra-reliable media and entertainment insdustry workflow servers that connect content creators, editors, colorists, graphic artists, and sound mixers with their ever-increasing stores of digital assets. The addition of the Jellyfish product line further establishes OWC as the leading provider of the most reliable M&E-focused storage and workflow solutions available to small video teams and large scale productions.

Check out the latest Jellyfish solutions on

" The acquisitions of LumaForge and BRU technologies strengthen and expand both our enterprise/server storage and data management capabilities and enable an even broader lineup of solutions to serve all the needs of video, photography, and music professionals with some really exceptional new offerings. " — Larry O'Connor, Founder and CEO

THUNDERBOLT 4 VS. THUNDERBOLT 3
WHAT'S IN IT FOR ME?

This past summer, Intel released the specifications and expectations of Thunderbolt 4. It caused quite a stir, initiated a lot of conversation, and created a bit of fear in those heavily invested in Thunderbolt 3.

In a nutshell, Thunderbolt 4 is still Thunderbolt 3. Let's break it all down and answer a few questions about what Thunderbolt 4 is really all about.

CAN A THUNDERBOLT 4 COMPUTER USE THUNDERBOLT 3 DEVICES?

Absolutely! Thunderbolt 4 is a new standard, not a new technology. While Apple users have always benefited from Thunderbolt 3's remarkable capabilities, PC/Windows computers have had various implementation levels when described as having TB3 (see chart below). Now with TB4, a PC user can be assured that they have the full Thunderbolt feature set.

And yes, you can still use all your TB3 devices, knowing that they are the latest and greatest. A TB4 device merely utilizes a new feature set that supports and interfaces with all that came before.

CAN A THUNDERBOLT 3 COMPUTER USE THUNDERBOLT 4 DEVICES?

Affirmative. Thunderbolt 4 devices are currently Hubs and Docks, that for the first time ever, let you add Thunderbolt 3/4 ports from a single port on your computer. If you are an Apple user, you will need the latest macOS that includes support for this new capability. If you are a PC owner, it's a bit fuzzier – you will need to check with the actual PC maker.

Remember, Thunderbolt 3 and Thunderbolt 4 devices do not displace each other – Thunderbolt 4 is merely adding features and capabilities to the existing Thunderbolt 3 architecture. They all work together. Thunderbolt 4 does not replace Thunderbolt 3 – it just allows for better use of all USB Type-C connected devices.

HOW IS THUNDERBOLT 3 DIFFERENT FROM THUNDERBOLT 4?

Thunderbolt 4 doesn't make Thunderbolt any better – it just makes everything Thunderbolt 3 could already do a standard requirement.

		THUNDERBOLT 4	THUNDERBOLT 3 MAC	THUNDERBOLT 3 PC
Unrivaled Simplicity	One universal computer port	▢	▢	▢
	Accessories with four Thunderbolt ports	▢	▢	
Maximum Performance	Minimum PC speed requirements	40Gb/s	40Gb/s	20Gb/s
	Minimum PC video requirements	Two 4K displays	Two 4K displays	One 4K display
	Minimum PC data requirements	PCIe 32Gb/s USB 3.2 10Gb/s	PCIe 32Gb/s USB 3.2 10Gb/s	PCIe 16Gb/s USB 3.2 10Gb/s
	Required PC charging on at least one computer port	▢	▢	
	Standard, Required PC wake from sleep dock functionality	▢	▢	
	Minimum PC port power for accessories	15W	15W	15W
	Thunderbolt Networking	▢	▢	▢
Security	Required Intel VT-d based DMA protection	▢	▢	

A THUNDERBOLT 4 CABLE IS THE LINK YOU CAN COUNT ON, NO MATTER WHAT THE LINK IS

Take the guesswork out of what cables you need for your entire technology setup. The OWC Thunderbolt 4 / USB-C Cable is a plug and play safe solution for connecting any Mac, PC, iPad, Chromebook, or Surface tablet with a Thunderbolt 3, Thunderbolt 4, USB-C, or USB4 port to any device, display, or power supply with Thunderbolt 3, Thunderbolt 4, USB-C, or USB4 port. With lab test certified 100% universal USB-C compatibility and performance, whatever your devices – this Type C to Type C connection solution ensures you'll always have the right cable that simply works.

THUNDERBOLT 3 AND 4 ARE BOTH 'THE LATEST'

In no way does Thunderbolt 4 replace or diminish the great Thunderbolt 3. With OWC, you have and will continue to get the maximum potential out of all Thunderbolt has to offer. Thunderbolt 4 lets us do even more with Thunderbolt 3—with more ports—and that's fantastic!

For more, please read our blog post at www.macsales.com/thunderbolt

THE BOTTOM LINE

As a company devoted to helping keep your computer running longer, faster, and more efficiently, you can be assured that all the great new and used Macs OWC offers will be viable for many years to come. Long live your computer!

POCKET-SIZED POWERHOUSES

PORTABLE SSDs FOR ALL COMPUTERKIND™

Tiny. Tough. Thrillingly fast. The Envoy Pro family of portable SSDs are the ideal companion for all data storage needs. From personal to pro and from desktop to on-the-go.

NEW! OWC ENVOY PRO FX
Up to 2800MB/s | Up to 2.0TB | Mac, Windows, Linux, Chrome OS, & iPadOS

The fastest, most compatible bus-powered portable drive For All Computerkind. The first of its kind to go into space and return to work with yesterday's, today's and tomorrow's Thunderbolt and USB computers/devices. Perfect for audio, video, photography, graphics, gaming, and general data storage/backup uses.

— Flexible compatibility: Macs and PCs, plus iPad, Chromebook, and Surface devices

— Xtremely fast: supports Thunderbolt and USB interface up to 2800MB/s

— OWC Aura SSD powered: up to 6x faster performance vs. other portable SSDs

— Built like a tank: dust/drop/waterproof certified

— Protected: 3 Year OWC Limited Warranty

240GB–2.0TB from $179
www.macsales.com/envoyprofx

NO MORE INTERFACE WORRIES!
This stealthy and silent drive plugs into computers, tablets, and smartphones so you can transfer files as fast as your device can go!

NEW! OWC ENVOY PRO SX
Up to 2847MB/s | Up to 2.0TB | Mac & Windows

This super-fast, rugged portable Thunderbolt SSD for daily to production-level audio, design, and photography storage needs.

— Super-fast: up to 6x faster performance vs other portable SSDs

— Super versatile: perfect for A/V, photo, graphics, gaming, and general storage/backup

— Xtremely portable: bus-powered and smaller that most compact size smartphones

— Xtremely rugged: dust/drop/waterproof certified

— Protected: up to 3 Year OWC Limited Warranty

240GB–2.0TB from $149.75
www.macsales.com/envoyprosx

ONE SUPER LITTLE BEAST
This SSD handles daily storage to production-level workflows like a true superhero. And it's extremely rugged to shrug off the most perilous work and play settings.

NEW! OWC ENVOY PRO ELEKTRON
Up to 1011MB/s | Up to 2.0TB | Mac, Windows, Linux, Chrome OS, & iPadOS

The fastest and toughest mini-sized SSD in the universe. Put massive-sized personal and work files in the palm of your hand while pushing USB-C's bandwidth to the max. Edit and save wherever, whenever on virtually any Mac, PC, or mobile device.

— Unbeatable: up to 2x faster performance than other mini-sized SSDs

— Universally compatible: works with past/present/future Thunderbolt and USB Macs plus iPad Pros, Chromebooks, and Android tablets

— Impenetrable: crushproof, dustproof and waterproof

— Protected: up to 3 Year OWC Limited Warranty

240GB–2.0TB from $99.00
www.macsales.com/elektron

SMALLER. FASTER. LIGHTER.
Half the size of a smartphone and bus-powered, yet able to transfer gigabytes of data in seconds with anything, anywhere.

ADD CHOICE OF DRIVE IN 3 STEPS
Quick DIY solution for today's and tomorrow's storage needs

OWC ENVOY EXPRESS
Up to 1553MB/s | 0GB Add your own drive | Mac & Windows

World's first Thunderbolt-certified, bus-powered 'add your own drive' enclosure that puts super-fast video, audio, and gaming backup and storage in your pocket for easy transport.

— Lightning speed: supports up to 1553MB/s real-world performance
— Certified: first bus-powered enclosure that meets stringent Thunderbolt power requirements
— Easy DIY: uses any NVMe M.2 2280 SSD available today and in the future
— Gets onboard: includes removable slide mount for out-of-the-way use convenience
— Compact: shorter than a ballpoint pen and weighs a mere 3.3 ounces with drive
— Protected: 2 Year OWC Limited Warranty

only $79.00
www.macsales.com/envoyexpress

OWC ENVOY PRO EX WITH USB-C
Up to 980MB/s | Up to 8.0TB | Mac, Windows, Chrome OS, & iPadOS

Take your photos, videos, and music with you wherever you roam. With lightning-fast speeds up to 980MB/s, you can edit 4K videos and photos or drag and drop files in mere seconds. You can even record directly from USB-C cameras.

— Supercharged: powered by an OWC NVMe M.2 SSD, designed to go everywhere
— Robust: edit large format files directly from the drive
— Mobile: bus-powered and fits in your pocket
— Impenetrable: crushproof, dustproof and waterproof
— Protected: up to 3 Year OWC Limited Warranty

WORLD'S FIRST PRODUCTS

Explore new frontiers in productivity and creativity. Boldly reach higher and do more. These forward-thinking products transport you into a new future with limitless potential.

OWC ACCELSIOR 8M2
World's fastest and highest capacity PCIe SSD for 2019 Mac Pro, Windows or Linux computers with mind-blowing ultra-reliable speed up to 26,926MB/s. p. 46

OWC THUNDERBAY FLEX 8
World's first Thunderbolt 3 storage, docking, and PCIe expansion solution. p. 10

OWC THUNDERBOLT HUB
For the first time ever add three Thunderbolt/Universal Type-C ports and one USB Port for connecting more storage, devices, and displays. p. 33

OWC ENVOY EXPRESS
World's first Thunderbolt-certified, bus-powered 'add your own drive' enclosure that puts super-fast video, audio, and gaming backup and storage in your pocket for easy transport. p. 8

MERCURY PRO U.2 DUAL
World's first dual U.2 bay storage solution that combines blazing-fast NVMe SSD dual performance and massive capacity in a compact design. p. 25

OWC U2 SHUTTLE
World's first U.2 carrier shuttle for 3.5-inch drive bays that combines four NVMe M.2 SSDs into a swappable, high capacity, flexible and RAID-ready storage solution. p. 40

HELIOS 3S WITH NVME INTERCHANGE SYSTEM
World's first U.2 interchange system revolutionizes storage with easy access, swaps and transport of U.2 SSDs up to 16TB. p. 41

8   Quality solutions, competitive prices, and expert support for over 30 years.

FLEX THROUGH EVERY WORKFLOW

OWC THUNDERBAY FAMILY

The amount of data you need to access and store efficiently increases daily. With multiple configurations to choose from, the ThunderBay line provides space, speed, and flexibility for your storage needs — today and in the future.

OWC THUNDERBAY FLEX 8
### Up to 2750MB/s | Up to 144TB | Mac

The world's first Thunderbolt storage, docking, and PCIe expansion solution. It's highly configurable to meet your unique workflow needs.

— Versatile: 8 FLEXible drive bays all supporting 2.5-inch/3.5-inch SATA 6Gb/s, and the top four bays also support NVMe U.2 for ultimate speed

— Connected: works with all devices with (1) USB-C and (2) USB-A ports

— Visual: DisplayPort 1.4 for connecting up to an 8K display

— Expandable: front-side SD 4.0 and CFexpress card readers

— Cutting-edge: PCIe (x16) slot for A/V, storage, RAID, networking, or I/O card

— Protected: up to 5 Year OWC Limited Warranty

DIY Enclosure for Max Configurability $1,199.00
www.macsales.com/flex8

MUSCLE-FLEXING READY SOLUTIONS
8 HDD MAXIMUM CAPACITY CONFIGURATION

Ideal for taming the voracious drive space appetite of RAW, 4K, large format, and VR workflows. Arrives pre-set with RAID 5 speed and protection. Select a recommended PCIe card or add your own to experience more expanded capabilities!

from $2,199.00

8 ENTERPRISE-CLASS HARD DRIVES
Edit and store entire projects on this ultra-capacity HDD RAID array that arrives pre-certified in RAID 5 for the best balance of data integrity and performance. Or, setup the RAID of your choice with flexible user configurable RAID 0, 1, 4, 5, 1+0 (10) options.

4 SSD + 4 HDD MAXIMUM FLEXIBILITY CONFIGURATION

Get the best of both worlds, a blazing-fast, high-capacity SSD RAID 0 project drive for large format, multi-stream workflows along with the added long-term storage capacity of HDD RAID 5. Select a recommended PCIe card or add your own to experience more expanded capabilities!

from $2,579.00

4 U.2 SOLID STATE DRIVES
Nothing speeds up your workflow like large SSD storage. This blazing-fast SSD RAID is perfect for large-format and multi-stream workflows.

4 ENTERPRISE-CLASS HARD DRIVES
Edit and store entire projects on this ultra-capacity HDD RAID array that arrives pre-certified in RAID 5 for the best balance of data integrity and performance. Or, setup the RAID of your choice with flexible user configurable RAID 0, 1, 4, 5, 1+0 (10) options.
1 NVME SSD + 7 HDD MAXIMUM WORKFLOW CONFIGURATION

Ingest and edit live on a hyper-fast U.2 SSD or use the drive as a swappable transport for fast lab processing while being able to edit and store projects on a HDD RAID 5 array. Select a recommended PCIe card or add your own to experience more expanded capabilities!

from $2,599.00

1 U.2 SOLID STATE DRIVE
This is the fastest FLEX Bay with up to 2750MB/s 4-lane PCIe performance. This is where you can harness the power of U.2 SSDs to experience their workflow enhancing maximum potential.
7 ENTERPRISE-CLASS HDD
Edit and store entire projects on this ultra-capacity HDD RAID array that arrives pre-certified in RAID 5 for the best balance of data integrity and performance. Or, setup the RAID of your choice with flexible user configurable RAID 0, 1, 4, 5, 1+0 (10) options.
PCIE CARD OPTIONS TO ENHANCE YOUR FLEX 8 WORKFLOW

Easily expand your capabilities. Add additional connectivity or storage with ease, or leave the PCIe slot empty for future expansion options.

OWC ACCELSIOR 4M2
With over 6000MB/s real-world performance, this workflow supercharger is a great storage addition to the OWC ThunderBay Flex 8.
www.macsales.com/accelsior4m2

AKITIO 5-SPEED 10G/NBASE-T
Integrate your Flex 8 perfectly into IP-based workflows. Runs up to 10G speed at 100m with Cat-6A cable, or up to 5G with Cat-6 cable.
www.macsales.com/akitio5speed

FLEX 8 + SHUTTLE + HELIOS =
THE ULTIMATE DIT AND MEDIA PRODUCTION WORKFLOW

## 1 SWAPPABLE U.2 SSD/SHUTTLE + 7 HDD

Ingest and edit live on a hyper-fast U.2 SSD or use the drive as a swappable transport for fast lab processing while being able to edit and store projects on a HDD RAID 5 array. Select a recommended PCIe card or add your own to experience even more expanded capabilities!
from $2,599.00

SSD

1 SWAPPABLE U.2 SSD/SHUTTLE

This is the fastest FLEX Bay with up to 2750MB/s 4-lane PCIe performance. This is where you can harness the power of U.2 SSDs to experience their workflow enhancing maximum potential.

7 ENTERPRISE-CLASS HDD

Edit and store entire projects on this ultra-capacity HDD RAID array that arrives pre-certified in RAID 5 for the best balance of data integrity and performance. Or, setup the RAID of your choice with flexible user configurable RAID 0, 1, 4, 5, 1+0 (10) options.

OWC THUNDERBAY 8
### Up to 2586MB/s | Up to 144TB | Mac & Windows

Eight hot swappable drive bays makes you feel like you're running your own personal data center! Two Thunderbolt ports so you can breeze through business backups, as well as today's highest RAW photo and multi-stream 4K video formats.

— Mix or match: 2.5-inch (no adapter needed) and 3.5-inch HDDs and SSDs

— Connected: second Thunderbolt 3 port for adding up to five additional Thunderbolt devices

— SoftRAID: manages, monitors, and protects your data

— Powerful: daisy-chain six units together for up to 864TB capacity

— Protected: up to 5 Year OWC Limited Warranty

ARGEST SOFTWARE SOLUTIONS
From simple data ingest to large scale deep archiving, OWC ArGest® Software Solutions, Powered by BRU, offer a complete toolset of cost-effective, easy-to-use function-specific tools that put you in control of your data's future without limits or exceptions.

ArGest® BACKUP

Whether you're running a small business or are an M&E pro, whether you want to backup a single desktop machine to a single drive external storage solution or have a massive tape library with multiple tape drives, ArGest Backup has you covered. A drag and drop interface delivers unmatched ease of use while true cross platform restorability in all archive formats keeps data protected and future accessible.

To see how ArGest solutions can work for you, please visit macsales.com/argest

ARGEST TAPE TOOLS

Puts you in control of all tape technologies and formats within macOS! Now you can transfer any TAR, CPIO, or PAX-formatted tape onto a Mac regardless of the platform (Linux, Solaris, etc.) used to write the tape. You also gain the ability to write TAR tapes on your Mac and restore TAR-based archives written in any closed or open source application.

ArGest® SERVER™

No matter what size your network, you can support it with easy to manage centralized, enterprise-grade tape, disk, or cloud data backup and recovery services with complete regulatory compliance. All major OS platforms - macOS, Windows, Linux, Unix - are GUI supported as well as your existing hardware or cloud storage services.

ArGest® IngestPRO Powered by BRU
Ingesting BRU, LTFS, and tar tapes as well as disk and camera card data onto your macOS system has never been easier! With automated format recognition, you can restore any content with a single click to your macOS Volume.

ARGEST BRU CORE

Give your command line the power of a high-performance BRU I/O engine. Script and control BRU backup and restore operations in your own app without a GUI overhead. BRU Core can be used to clone drive content, create a deep archive for offsite retention or perform daily backups of your corporate data infrastructure to a secure cloud environment. And with its fully cross-platform device compatibility, your archives will never be tied to a data set, specific OS version, or device.

WORK BETTER.

WORK TOGETHER.

THINGS WORK BETTER WHEN THEY WORK TOGETHER.

Our software and hardware teams work together to produce powerful, efficient, and beautifully made technologies. From our reliability-focused hardware that protects your precious data to our software that ensures you get the most out of that OWC hardware, to our backend tools that optimize and stress test each solution, we're diligent about ensuring your new OWC solution is ready to perform seamlessly.

Our dedicated team works on every facet of our solutions, from top to bottom, inside and out. Our products are fine-tuned to work exactly as designed and address your needs with pin-point accuracy. It's the OWC Advantage.

SoftRAID
an OWC brand

Easily Manage, Monitor and Protect Your Data

For over 25 years, SoftRAID has been the most fully featured, robust and powerful software RAID solution available for macOS. Now that "ability" is available for Windows users too!

SoftRAID saves you time and money by making it easier to maintain mission-critical workflows. With SoftRAID, you're no longer locked into an expensive hardware RAID technology that's not upgradeable or expandable.

NEW! SOFTRAID RAID 0, 1, 4, 5, 1+0 (10) / MAC & WINDOWS

OWC's SoftRAID is a powerful and intuitive software RAID utility for macOS and Windows that offers maximum volume capacity, optimum drive performance, data protection, or a combination of both. Packed with features like predictive disk failure monitoring and multiple array volume spanning, SoftRAID is ideal for anyone who needs to quickly access and safely store massive amounts of data, including videographers, audio producers, photographers, database and media managers, archivers, and more.

SoftRAID is designed to keep you working worry-free with protection and safety measures to secure your data. From disk certification, that makes sure new disks are error-free before use to disk validation that ensures all data is readable, SoftRAID keeps your data safe. SoftRAID also includes powerful real-time monitoring features that can warn you when a disk is about to fail. All these advanced monitoring tools work in the background to ensure you're constantly protected from a catastrophic, project-killing data loss.

With breathtaking performance, multi-enclosure capability, advanced drive monitoring, and downloadable updates, OWC SoftRAID is data center level software for your desktop.

SOFTRAID FOR WINDOWS

SOFTRAID FOR MAC

— Compatible: works with macOS including Big Sur and Apple Silicon (M1) Macs as well as Windows 10

— Powerful: create and manage RAID 0, 1, 4, 5, 10 volumes*

— Protected: monitors drive and RAID volume health with real-time notifications

— Certified: drives are validated before use to ensure they are safe for data storage

— Verified: volume validation ensures sectors can be read, parity is correct, and any potential volume failure is minimized

— Cross-platform: includes built-in OWC MacDrive technology that enables you to share SoftRAID volumes between macOS and Windows computers

— Thorough: full TRIM support improves internal and external SSD performance in all RAID levels

— Risk-free: 30-day free trial of fully functional application

SoftRAID Pro **only $199.99**
Mac & Windows OWCSFR6P

* RAID 4, 5, 1+0 (10) Mac only, available for Windows soon.

With breathtaking performance, multi-enclosure capability, advanced drive monitoring, and downloadable updates, OWC SoftRAID is data center level software for your desktop.

A BEGINNER'S GUIDE TO
UNDERSTANDING RAID

When it comes to your photos, videos, and other valuable files, you don't want to skimp on data security and management. Whether it's past archives, existing projects, or future jobs, RAID storage solutions are vital to optimize and protect your digital work.

WHAT EXACTLY IS RAID?

RAID commonly stands for "Redundant Array of Independent Disks." Simply put, a RAID puts two or more separate drives together to act like one. This will keep your data safe, let you access your data faster, or some combination of the two. A RAID distributes data across volumes (or drives) in several different ways, depending on the "level" of RAID you choose.

WHAT ARE THE DIFFERENT RAID LEVELS?

There are multiple levels of RAID and each has its own pros and cons regarding the balance of speed and security. RAID levels are denoted by different numerical values (RAID 0, RAID 1, etc.), but these are only for identification and do not signify number of disks, performance or any other metric.

RAID 0	RAID 1	RAID 4	RAID 5	RAID 6, 6+	RAID 1+0 (10)
Stripes	Mirrors	Stripes with Dedicated Parity	Stripes with Distributed Parity	Stripes with distributed parity on multiple disks	Stripes and Mirrors
• Fastest RAID • No protection from disk failure • Best for scratch storage when editing digital video/photos/media • Good for large and small files • Requires 2 or more disks	• Extremely Safe RAID • Highest level of disk failure protection • Best for critically important data where access speed is not an issue • Good for large and small files • Requires 2 or more disks	• Fast and safe • Best for general use on SSDs • Super-fast read/write of large files used for video, animation, photography, and graphics • Good for large files • Requires 3 or more disks	• Fast and safe • Best for general use on HDDs • Super-fast read/write of large files used for video, animation, photography, and graphics • Good for large files • Requires 3 or more disks	• Fast and safe • Data protected if a disk fails and protects during rebuild • Best for data archiving when user needs • Good for large files • Requires 4 or more disks	• Fast and safe • Best for businesses or those needing high performance with increased reliability • Good for large files• • Requires 4 or more disks

RAID 6, 6+: * RAID 6 is best for HDDs, and RAID 6+ is best for SSDs.

STRIPES? MIRRORS? PARITY? WHAT?!

Striping spreads the data from one volume over multiple drives. Each drive contains only part of the volume.
Mirroring uses multiple drives to create a volume. Each drive contains a copy of the entire volume.
Parity computations are used for fault tolerance by calculating the data in two drives and storing the results on a third. *Dedicated Parity* is when this information is all stored on a single drive. *Distributed Parity* spreads the data across all the drives in the array.

What You Do	What You Need	What We Suggest
Photography, video, and audio editing	Lightning-fast access for scratch disk use	• RAID 0 for data access speed (Caution: RAID 0 gives no protection against disk failure)
Run a data server	Speed, safety, and flexibility	• RAID 5 to give flexibility along with fast data access and full protection from disk failure
Run a business with critical data	Complete protection against disk failure	• RAID 1 for maximum protection against disk failure
Design work, photography, animation, etc.	Fast access, safe storage, and to meet deadlines	• RAID 4, 5, 6 or 6+ for great speed, data safety, and the ability to work through disk failure • RAID 1+0 if you have four or more disks and need to write many small files to your disk
Use your computer for work and play, and for storing music, photos, and other important files	Fast access and protection against disk failure	• RAID 4, 5, 6 or 6+ to give fast data access and keep files safe from disk failure • RAID 1+0 if you have four or more disks and need to write many small files to your disk

MACDRIVE
Access Mac Disks on Windows

MacDrive lets you seamlessly access Mac-formatted disks, drives, SoftRAID sets, and AppleRAID sets on a Windows PC. Just connect your drive to a PC, and Windows uses the disk as if it were Windows formatted.

— Straightforward: access almost any direct attached internal or external Mac-formatted disk including hard drives, CDs, DVDs and more

— Pliant: supports read/write HFS+, read APFS

— Mighty: create and partition Mac disks direct from Windows

— Cutting-edge: repair errors on Mac disks — browse Time Machine back-ups and copy files and folders

— Compatible: works with Apple's Boot Camp and VMware and Parallels

DOCK EJECTOR
Your Drives and Data, Safely Ejected in One Click

Connecting multiple devices to an OWC dock is an easy way to streamline your workflow and minimize desktop cable clutter. But with only one cable connecting your dock to your computer, it's easy to forget to properly eject storage devices which could cause lost or damaged files.

The OWC Dock Ejector is a FREE solution that protects your data. The app lets you safely disconnect all drives in a single click. It ensures all data has been written before any drive is unmounted. It will even warn you before you accidentally eject an in-use drive.

— Optimized for all OWC docks
— Available for Mac or Windows

Free - Download Now

OWC USB TYPE-A TO USB-C ADAPTER

Connects older USB-A devices to USB-C-equipped computers, Chromebooks, and docks.

only $7.99
www.macsales.com/usbc-adapter

OWC THUNDERBOLT 3 10G ETHERNET ADAPTER

Add warp speed file transfers with the highest data integrity to your workflow with this bus powered portable Ethernet supercharger. Synchronize multiple audio and video streams in real-time with AVB readiness.

— Blazing-fast: 10x faster than Gigabit Ethernet

— Compatible: works with Thunderbolt 3 Macs and Windows PCs

— Bus powered: energy efficient and no AC adapter needed

— Secure and stable: offers more reliable connection and data security than WiFi

— Protected: 1 Year OWC Limited Warranty

only $140.00

NEW! NEWERTECH USB-C TO DISPLAYPORT ADAPTER

Watch videos, play games, create crisp digital signage walls, and make eye-catching presentations on up to an 8K DisplayPort display or projector. Backward compatible so you can connect your USB-C equipped computer, iPad, smartphone, dock, or hub to any DisplayPort display.

— High speed: HBR3 for higher refresh rates and up to 8K UHD resolution

— Stunning visuals: HDR for sharper images, brighter colors, and greater contrast

— Hear more: supports multichannel high-definition digital audio formats

— 3 Year NewerTech Limited Warranty

only $18.99
www.macsales.com/usbcdp

NEW! NEWERTECH USB-C TO HDMI ADAPTER

Stream sports, watch videos, play games, browse the internet, or create digital signage walls on up to a 4K HDMI display, TV, or projector. Backward compatible so you can connect your USB-C equipped computer, iPad, smartphone, dock, or hub to any HDMI display.

— Supports up to 4K maximum resolution

— Supports HDR for sharper images, brighter colors, and greater contrast

— Supports HDCP 2.2 content protection

— 3 Year NewerTech Limited Warranty

only $12.99

KEEPING YOU IN THE FAST LANE WITH
# U.2 TECHNOLOGY

You like pushing the limits of your abilities and technology. You depend on OWC products – and knowledge – to keep you pushing ahead in the fast lane. That's why we're bringing you up to speed (pun intended) on the emergence of U.2 storage technology and how you can add it to your workflow.

## U.2, M.2, NVME, PCIE… MAKING SENSE OF THE TECHNOBABBLE

In a nutshell, all those acronyms are about how storage technology has evolved to offer you the best possible performance. Some are communication protocols, while others are physical connections. Together they lead us to where we are today with fastest SSD storage.

EFFECTIVE COMMUNICATION

PCIe SSDs were first used in the enterprise market as add-in cards because they offered a faster path of data transfer, but they were constrained by hardware and software technologies designed for slower hard drive storage. Enter NVMe (Non-Volatile Memory Express), designed from the ground up specifically for PCIe SSD storage.

VS

LOADING…

LOADING…
LET'S GET PHYSICAL

PCIe SSD performance blew everything else away, so the race was on to incorporate PCIe SSD storage into thin laptops and tablets. Thus, the cost effective M.2 SSD was born. Often referred to as a "blade" or "gumstick" due to their physical shape and size, SSDs with an M.2 connector also became ideal for creating extremely fast pocket-sized drives found in the OWC Envoy line (p. 6) which are powered by the OWC Aura P12 Pro M.2 SSD (p. 48).

U.2 (AND OWC) DOES IT ALL

Created as an extremely cost-effective "one-for-all" server and enterprise drive interface, a U.2 connector is designed to work with SATA, SAS, and NVMe drives. Recognizing this was a great opportunity to build upon the proven performance attributes and affordability of M.2 drives, OWC began developing U.2 equipped solutions. U.2 drives offer key advantages over M.2 drives:

— 2.5-inch or 3.5-inch form factor for common drive bay installation

— Larger form factor allows higher storage capacities

— Larger form factor provides built-in heat dissipation

— Easy access hot swap support

QUICK REFERENCE GLOSSARY:

M.2: connector type…uses PCIe or SATA communication

U.2: connector type…uses PCIe, SAS, and SATA communication

NVMe: optimizes SSD data flow over PCIe

PCIe: computer hardware communication system used to transfer data between components like RAM, CPU, & SSD

SATA: computer hardware communication system originally designed for HDD data transfer and later used with SSDs

INNOVATIVE
OWC U.2 SOLUTIONS
FOR YOUR WORKFLOW

Blazing speed, more capacity, and easy hot swap access… just a few reasons why you should consider incorporating U.2 solutions into your workflow. Naturally, OWC offers a variety of groundbreaking ways to immerse yourself in the latest advancements in storage technology. All with proven OWC reliability and pro-level performance.

p. 40

p. 41

U.2 EARLY ADOPTERS

Does your end-to-end workflow have PCs or enclosures with 3.5-inch drive bays? The innovative OWC U2 Shuttle is the world's first U.2 carrier shuttle for 3.5-inch drive bays that combines four NVMe M.2 SSDs into a swappable, high capacity, flexible, RAID ready storage solution.

How to Use it:
Swap out and ship the compact and lightweight U2 Shuttle to the post lab where it swaps into a 3.5-inch U.2 equipped PC or storage solution quickly and economically.

NOTEBOOK/SFF/AIO USERS

Notebook, small form factor, and All-In-One computers typically lack the room for an expansion slot. Now you can add video production, audio processing, data storage, networking, and other pro-level capabilities to your workflow with the OWC Mercury Helios 3S external PCIe expansion solution.

How to Use it:
With the OWC U.2 NVMe Interchange System, you can offload the day's shoot into the OWC Mercury Helios 3S, quickly pull the Interchange System tray-mounted U.2 NVMe SSD out and send the drive on to post production. Imagine… no more tedious drive enclosure disassembly to access the storage drive or costly shipping of the entire enclosure to the post lab.

UP TO **16TB** CAPACITY

UP TO **128TB** CAPACITY

UP TO **16 TOTAL** NMVe SSDs!

p. 41

p. 10

p. 40

PROS SEEKING FAST & MASSIVE CAPACITY

Looking to add massively – up to 16TB – fast U.2 storage to your workflow? The compact, dual-bay Mercury Pro U.2 Dual storage solution is your ticket! It offers the flexibility of multiple drive configurations to meet your specific need:

— 2.5 or 3.5-inch NVMe U.2 SSD in each bay

— A single NVMe M.2 SSD with a U.2 adapter in one or both bays

— Up to eight NVMe M.2 SSDs via the OWC U2 Shuttle

— Coming soon, the world's first U.2 carrier shuttle for 3.5-inch drive bays that combines NVMe M.2 SSDs into a high capacity, flexible RAID ready storage solution

How to Use it:
Mercury Pro U.2 Dual solutions deliver fast speed with more drive and RAID options than typical dual drive enclosures. You can ingest and edit video footage in real-time or backup large content libraries in a blink. While a performance heavyweight, this storage solution easily fits on a DIT cart, in a rack, or on your office desktop.

PROS SEEKING A WORKFLOW WORKHORSE

Massively boost your workflow productivity with ThunderBay Flex 8. It's the world's first 3-in-1 Thunderbolt 3 storage, docking, and PCIe expansion solution for digital imaging, VFX, video production, and video editing professionals. Four of its eight 2.5 or 3.5-inch drive bays can use U.2 NVMe SSDs. There's an abundance of ports for connectivity, card readers for fast media ingest, and an expansion slot to expand your capabilities.

How to Use it:
Its four U.2 bays let you use U.2 SSDs by themselves, or put them into an OWC U.2 NVMe interchange system tray for transport and shipping. Or, combine up to 16 M.2 SSDs with the OWC U2 Shuttle for up to 128TB capacity coming soon to create an unbeatably fast RAID volume that's easily swapped and transported. With the PCIe expansion slot, you can add a 4K video capture card for direct ingest of multi-stream high-res footage. Or, add an audio card to record high-quality tracks, then edit and archive tracks.

38 Quality solutions, competitive prices, and expert support for over 30 years.

A GALAXY OF POSSIBILITIES AWAITS

OWC MERCURY HELIOS 3S
Up to 40Gb/s | PCIe Expansion | Mac & Windows

Give your slotless Mac, Windows PC notebook, or desktop machine the gift of PCIe card use. You can also add video production, audio processing, data storage, networking, and other pro-level capabilities to your workflow via Thunderbolt 3.

– Lightning-fast: 40Gb/s transfer speeds (2) Thunderbolt 3 ports
– See more: dedicated DisplayPort for adding a high resolution display
– Charge while working: 85W of notebook charging
– Play your card: uses half-length, full-height, single or double-width cards
– Easy card installs: no tools required
– Secure workflow: locking 12V power connector
– Protected: 3 Year OWC Limited Warranty

only $229.75

OWC U2 SHUTTLEONE
Up to 8000MB/s | Up to 8.0TB | Mac & Windows

The OWC U2 Shuttle is a heat-dissipating full metal housing adapter that converts an NVMe M.2 SSD into a swappable 2.5-inch U.2 SSD.

– Flexible: easily install an NVMe M.2 SSD in minutes
– Swappable: protects your SSD connector from wear
– Unlimited: supports the highest speed your SSD can deliver
– Beyond fast: fully PCIe Gen 1-4 certified for today's and tomorrow's SSDs up to 8,000MB/s
– Broad compatibility: use in 2.5-inch U.2 bays and in OWC ThunderBay Flex 8, Mercury Pro U.2 Dual, and Mercury Helios 3S with U.2 NVMe Interchange System
– Optimum cooling: full metal housing keeps drive running cool and throttle-free

8.0TB COMING SOON
www.macsales.com/u2shuttleone

TURN MERCURY HELIOS 3S INTO A BLAZING FAST EXTERNAL SSD!

With the Accelsior PCIe SSD family, you can choose "add your own" single NVMe SSD PCIe cards all the way to four blade configured solutions that deliver over 6000MB/s real-world speed. p. 47

NEW! OWC U2 SHUTTLE
Up to 1556MB/s | Up to 32TB | Mac & Windows

World's first U.2 carrier shuttle for 3.5-inch drive bays that combines four NVMe M.2 SSDs into a swappable, high capacity, flexible and RAID-ready storage solution. Built for OWC storage and PCIe expansion solutions, this innovative carrier shuttle can also be used with U.2 connector equipped PCs and servers.

– Configurable: choose a solution or add your own NVMe SSDs
– RAID ready: RAID 0, 1, 4, 5, or 1+0 (10) for speed, protection, or the best of both attributes
– Compatible: use with OWC Helios 3S, ThunderBay Flex 8, as well as in a computer with U.2 support and an available 3.5-inch drive bay
– Easy swaps: move between OWC U.2 devices, PCs, enclosures, and servers
– Ideal for media workflows: dramatically lowers production-to-lab shipping costs

only $149

IDEAL FOR MEDIA PRODUCTION WORKFLOWS!

OWC U.2 NVME INTERCHANGE SYSTEM
Turns Mercury Helios 3S into a Swappable U.2 NVMe SSD Storage

Revolutionize your data storage. A locking drive bay and protective carrier tray offer the ideal combination of security with easy access, swaps, and transport of U.2 NVMe SSDs up to 16TB. Speeds over 6x faster than SATA drives. Ideal for both production and post-production operations!

– Full speed ahead: up to 2,631MB/s real-world tested performance
– Durable solution: protects U.2 connector for improved drive longevity and investment
– Use anywhere: enables U.2 NVMe drive use in the studio or out in the field
– Designed for global workflows: dramatically lowers production to lab shipping costs

ASTONISHING, MIND-BLOWINGLY HOLY $#!+ FAST

NEW! OWC ACCELSIOR 8M2
Up to 26,926MB/s | Up to 64TB | Mac & Windows

Accelsior 8M2 is the fastest, highest capacity PCIe SSD in the galaxy. It utilizes the full bandwidth of the latest PCIe technology to provide mind-blowing ultra-reliable speed up to 26,926MB/s and unparalleled storage space for large format postproduction editing, real-time VR/AR/MR, geospatial and ISR imaging, and huge dataset applications. Up to eight SSDs let you choose multiple RAID levels and RAID sets for maximum flexibility. The Accelsior 8M2's highly efficient and quiet heat-dissipating design delivers consistent peak performance.

— Revolutionary: the fastest drive available for 2019 Mac Pro, Windows or Linux computers and PCIe expansion systems

— Mind-blowing performance: up to 26,926MB/s real world speed

— Massive space: up to eight SSDs for jaw-dropping storage capacity

— Easy RAID: create, monitor, and manage RAID arrays with SoftRAID

— Advanced RAID capabilities: supports multiple RAID levels and RAID sets for maximum flexibility

— Quietly cool: highly efficient and quiet heat-dissipating design for consistent peak performance

— Pre-tested and certified: full burn-in for assured performance and reliability

— Protected: up to 5 Year OWC Limited Warranty[2]

EXPANSION ANYONE...

Works with any Mac, PC. or PCIe expansion chassis such as an eGPU enclosure that supports full height, full length PCIe cards. Test certified and verified compatible with the Akitio Node Titan. p.42

OWC ACCELSIOR 4M2
Over 6000MB/s | Up to 32TB | Mac & Windows

Nearly a decade after our first SSD introduction, we continue to push the boundaries so you can work and play at your best. With over 6,000MB/s of real-world speed, you can breeze through data-intensive large-format video editing, greatly improve your VR/AR/MR experience, and play your best in extreme gaming.

— Bootable: start working in seconds

— Slot-powered: no extra power cables needed

— Deployment ready: pre-configured solutions undergo performance verification

— Highly versatile: installs into a full-height, half-length x8 or x16 PCIe 3.0 or 2.0 slot

— Plug and play: no drivers needed

— Easy RAID: advanced SoftRAID engine simplifies setup

— Protected: up to 5 Year OWC Limited Warranty

0GB only $349.00

www.macsales.com/accelsior4m2

NEW! OWC ACCELSIOR 1M2
Over 3200MB/s | Up to 8.0TB | Mac & Windows

The speed boosting, capacity expanding NVMe SSD solution for pro content creators, performance enthusiasts, and gamers. Test-certified for use with 2019 Mac Pro, 2010-2012 Mac Pro, and PC towers.

— OWC Aura SSD powered: advanced NVMe technology for bandwidth-heavy video, audio, photography, and design needs

— Store more: adds capacity for critical footage, images, files and games.

— Play better: experience immersive, stutter-free game play

— Cool: aluminum alloy heat sink for silent, throttle-free performance

— Protected: up to 5 Year OWC Limited Warranty

0GB only $29.00
240GB–4.0TB from $79.00
www.macsales.com/accelsior1m2

NEW! OWC ACCELSIOR 1A
Over 3200MB/s | Up to 4.0TB | Mac & Windows

After adding a higher capacity Aura PCIe SSD to your Mac, you can now use that replaced drive for data recovery, data migration, and additional storage capacity. Use with a Mac Pro tower, PC tower or PCIe expansion chassis like the OWC Helios 3S.

— Multipurpose: provides a variety of continued drive use options

— Compatible: supports Late 2013 to current Apple SSDs and all OWC PCIe Aura SSDs

— Maximize ROI: extends investment in and use life of original drive

— Store more: adds capacity for critical projects, files and games

— Protected: 1 Year OWC Limited Warranty

only $32.99
www.macsales.com/accelsior1a

OWC AURA PRO X2
Up to 3282MB/s | Up to 2.0TB

Rejuvenate your Mac with performance that rivals the latest models at a fraction of the cost. Choose blade only or the full upgrade kit! Some kits even include an OWC Envoy Pro enclosure that repurposes the factory SSD into an external USB 3 drive.

— Like a new Mac: up to 2x faster than factory SSD
— Store more: up to 16x greater capacity than factory SSD
— Same but better: retains use feel, settings, and the ports you want
— Run at peak longer: consumes less power and runs cooler for longer battery life
— Protected: 5 Year OWC Limited Warranty

NEW! OWC AURA N2
Up to 2400MB/s | Up to 1.0TB

Add years of useful life to your existing Mac notebook or Mac mini, economically. Choose blade only or full upgrade kit. Some kits even include an OWC Envoy Pro enclosure that repurposes the factory SSD into an external USB 3.0 drive!

— Maximize ROI: extends Mac use-life with higher speed and stamina
— Keep FAV files: up to 8x greater storage capacity than factory SSD
— Same but better: retains use feel, settings, and ports you want
— Extends run time: more efficient, cooler operation for longer battery life
— Protected: 3 Year OWC Limited Warranty

### OWC AURA P12 PRO
Up to 3400MB/s | Up to 4.0TB

The versatile internal or external performance booster. Keep your project on track with faster data transfers in the field, as well as faster previews, renders, and processing in audio and VFX programs.

— Pro level speed: faster previews and renders, transfers, and streams
— Workstation-class: calibrated to endure write-intensive workflows
— Perfectly optimized: built-in SLC caching for burst performance
— Protected: 5 Year OWC Limited Warranty

NEW! OWC AURA P13 PRO
Up to 2771MB/s | Up to 2.0TB

The Aura P13 Pro might be small, but it delivers a heavyweight performance punch upgrade to computers and devices that use a 2242-sized M.2 SSD. It's the fastest compact SSD option on the market today.

— Class leading performance: for faster pro A/V workflows, video streaming, app/gaming load times, and more
— Compact solution: the best choice for computers and devices that utilize a 2242-sized M.2 SSD
— Advanced technology: for the highest reliability and performance
— Protected: 5 Year OWC Limited Warranty

SUSTAINABILITY IS GOOD BUSINESS

As we grow, so does our commitment to sustainability. We're proud to be a zero-emissions company, and always working towards minimizing our environmental impact. In 2015, we reached our goal of generating more power than we consume. Sustainability can also be economical. We provide customers with products that allow them to maximize the longevity of their technology and we extend this approach to our business operations.

We have worked tirelessly to build sustainable practices into all levels of our company. We currently recycle 97 percent of our solid waste materials. And our efforts haven't gone unnoticed: We're Energy Star certified, and in 2010, we received the LEED® Platinum Certification by the Green Building Certification Institute.

SUSTAINABILITY AT-A-GLANCE

— Nearly zero waste with widespread recycling programs

— Eco-friendly, recyclable packaging

— First U.S. technology manufacturer with a fully wind powered on-site turbine

— A LEED Platinum and Energy Star certified building

— Recycle 97% of solid waste materials

— One of the largest privately-owned solar arrays in Illinois
WIND POWER

Clean, limitless, efficient. OWC's wind turbine is the foundation of our environmentally responsible alternative energy efforts. We kicked off our on-site energy program with the installation of a Vestas V39-500kW wind turbine in 2009 at company headquarters in Woodstock, IL. OWC quickly became the first manufacturer/distributor in the U.S. to become 100% on-site wind powered. The wind turbine alone in Woodstock generates more power than is consumed at this location.
GEOTHERMAL HEATING AND COOLING

Corporate energy heating and cooling systems pose a large pollution risk for the communities in which they operate. That's why our Woodstock headquarters utilize a geothermal heating and cooling system. Unlike standard operations, we use an environmentally safe, biodegradable liquid in a closed loop — so there is never any risk of pollution.

SOLAR POWER

Go ahead... call us obsessive. Not content with harnessing the power of the wind and earth, OWC adopted solar power as an energy source at our two largest locations in Woodstock, IL and Austin, TX. In 2015, we installed and activated a solar power system in Woodstock to augment our existing wind power turbine. The solar system consists of 770 American-made Sun Power solar panels installed on the roof of the building, making it one of the largest privately-owned solar arrays in Illinois.

At OWC, we know tech questions don't only arise between 9 to 5 on weekdays. That's why we give you multiple ways to connect with our award-winning customer service team. OWC support teams are on-call and at the ready to talk you through any tech issue that comes up. Whether you choose to message us through online chat or call us directly, we're here to keep your OWC technology purchase functioning optimally 7-days a week.

Need someone to walk you through it? Live chat with our award-winning Tech Support Team Monday through Saturday, or reach our Customer Service/Sales team 7-days a week! Discover all the OWC resources available at www.macsales.com/service
